Special Wholesale Price List

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

TENNESSEE NURSERY COMPANY

CLEVELAND, TENNESSEE

FEBRUARY 10, 1921

These prices do not apply on orders placed before above date, on order placed before above date, the price in effect on the date order was placed will apply.

STURDY MOUNTAIN GROWN STOCK

Now is the time to plant fruit trees. In a few years fruit cannot be purchased at any price. The war cut short the growing of trees by the nurserymen. The man who has fruit trees will in a few years have a little fortune. Trees are now scarce and hard to get. We would advise you to place your order now.

1 to 4 trees or plants are sold at "each" rate; 5 to 49 are sold at the "10" rate; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at 1000 rate.

You may select any number of varieties that you wish. Different kinds of stock, such as plum, cherry, pear, nut trees, small fruits, etc., cannot be taken together to make up 10, 100, 500, or 1000 rates. As an example: If you should order 50 Mayflower Peach, 10 Elberta Peach, 10 Rome Beauty Apple, and 4 York Imperial, 4 Early Richmond Cherry trees and 6 Keiffer Pear you would be entitled to 100 rates on peach and 10 rate on apple trees, each rate on cherry and 10 rates on the pear trees.

Liberty Bonds or Victory Bonds and War Savings Stamps will be accepted at full face value. War Savings Stamps must be of 1918 or 1920 series.

All prices are f. o. b. Cleveland, Tenn. Large buyers should send list, giving number, size and varieties wanted, for special quotations. The 5 per cent. discount for order within fifteen days on page seven of this price list does not apply on War Saving Stamps and Liberty Bonds.

WE DO NOT ACCEPT ANY ORDER FOR LESS THAN \$1.00 AS WE CAN'T AFFORD TO FILL AN ORDER THAT IS LESS THAN \$1.00

WHY WE ASK OUR CUSTOMERS TO ORDER EARLY

The propagation of Nursery Trees and Plants is an art. It takes three or four years to develop Nursery Stock to planting size. The recent war greatly decreased propagation as 90 pct. of the Fruit Seedlings which Nurserymen plant are imported from France and for the last few years France has been able to furnish only very few seedlings as they cannot get help to grow them. It will be several years before they will again be able to produce the amount of stock they did before the war.

Fruit trees and plants will be high in price for the next four or five years. Hundreds of the smaller firms have already been forced out of business and there are hundreds of others who dig their last trees this spring as they cannot obtain Seedlings for a new planting.

Planters should appreciate the present situation and place their order early as the supply of many Standard varieties will certainly be exhausted before long.

PRICES BATT'S FOUR-EAR PROLIFIC CORN

Gallon, \$2.00 Peck, \$3.00 ½ Bushel, \$5.00 Bushel, \$8.00. Sacked f. o. b. Cleveland, Tenn. By Express or Parcels Post, not prepaid.

Has yielded as much as 201½ bushels per acre. Has taken premium at several state fairs. You can order now and it will be sent you in time to plant. Positively no order accepted for less than one Gallon.

OLD FASHIONED WHITE ENGLISH PEACH. Nearly as large as Genuine J. H. Hale, skin creamy white, very seldom with any red; pure white to the stone; fine for preserving. One of the finest eating peaches. Clingstone. We have the Genuine Old Fashioned White English. Who does not remember with delight the delicious flavor of this grand old peach. Ripens in September.

PEACHES--Budded.

Prices below are for all varieties of peaches except Genuine Hale, Old Fashioned Red Indian, Old Fashioned White English, Henrietta, Late Elberta, and Hill's Late Winter Keeper and Early Elberta. Prices for these varieties given elsewhere on this page.

HENRIETTA PEACH—Larger than Elberta. Most magnificent yellow-meated clingstone known, mostly covered with bright crimson; hardy productive bearer; always commands fancy prices, as it is the latest known variety of peach worthy of merit. In this climate it ripens September the first. This peach is strictly a commercial peach and on account of its late ripening it commands a very high price on the market. It is especially adapted to the South.

SPECIAL SELECT VARIETIES

KEIFFER PEAR—Large, rich, golden yellow; sometimes tinted with red on the sun exposed side, fair quality; excellent for canning. It has become a profitable market variety on account of its good shipping and keeping qualities. To properly ripen should remain on the trees until the leaves began to fall. Tree a most vigorous grower, and early bearer, one of the most resistant to blight, very prolific, and widely planted throughout the country. The tree is so hardy and free from the insect pests, gives it greater value than most other varieties. The fruit is of high color and great beauty, and sells more readily than fruits of better quality. October to November.

SMALL TREES GIVE RESULTS AND BEAR QUICK—Read Copy of Letter Below

Shallotte, N. C., July 1st, 1920.

TENNESSEE NURSERY CO., Cleveland, Tenn.

Gentlemen:—Please send me a copy of your catalog. We have a number of peach trees bought of you two years ago, and they are doing fine. We are canning peaches from them now. They were 1 and 2 ft. and 2 and 3 ft. high when we bought them, but now 12 to 16 feet. Everybody brags on this orchard.

Very truly,
LAYTON HEWITT.

1 to 4 trees or plants are sold at "each" rate; 5 to 49 are sold at the "10" rate; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at 1000 rate

SILVER-LEAFED MAPLES—A very quick grower. Trimmed moderately, it becomes of very fine shape. Certainly a very beautiful ornamental tree if given room to develop. Valuable where quick shade is desired, and grows to a good size. Very valuable on account of growing so rapid. Plant Silver-Leafed Maples and you will have shade in a short time. They are not like other shade trees, it is not necessary to wait a life time to have shade.

CLIMBING VINES AND CREEPERS

TRUMPET. Scarlett. A robust woody vine; twining tightly with numerous roots along its stems. It orange scarlet, trumpet shaped flowers cluster at the tip of the branches. Leaves light green. Will climb to great heights on trunks of trees, and for every purpose is one of the most ornamental, both as to foliage and flowers, among vines. Each 10 rate

TRUMPET, Scarlett	40c	35c
WISTERIA, Chinese. Purple and White	60c	50c
KUDZA	25c	20c

HONEYSUCKLE. Hall Japan. Flowers pure white, changing to cream color, exceedingly fragrant, blooming from July until winter. Fine climber for trellises, walls, etc. Hardy and healthy. Holds foliage until late winter—almost an evergreen. Spreads rapidly—a fine ground cover for banks and shaded places where grass will not grow. Best climbing honeysuckle

IVY, Boston	45c	40c
CLEMATIS. Large flowers, Henryii White	35c	40c
CLEMATIS. Large flowers, Jackmanii Purple	60c	50c
CLEMATIS. Large flowers, Mad. Andre Red	60c	50c

CLEMATIS. Panchulata (Sweet-scented Japan Clematis). Medium sized flowers, fragrant, pure white, borne in immense sheets in September and October when very few other vines are in bloom

ROSES, 2-year.. Los Angeles and Dr. W. Van fleet	55c	45c

Dear Customer:

We will allow you a special discount of 5 per cent. from this price list, if you will send in your order within 15 days from above date, returning this slip and send Cash in full with order. If you wish you may deduct 5 per cent. from your order or we will send the 5 per cent. in such stock as you may select. This 5 per cent. discount does not apply on War Savings Stamps and Liberty Bonds. Remember too, we can hold your order and ship out at any time later in the season that you may instruct us. Better buy now while they last.

BUY NOW AND GET THE 5 PER CENT. DISCOUNT.

Many times this discount will pay Parcel Post or Express

1 to 4 trees or plants are sold at "each" rate; 5 to 49 are sold at the "10" rate; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at 1000 rate.

WHAT AGE, SIZE AND PRICE TREES DO YOU WANT TO PLANT?

Commercial orchardists nearly always select one year old trees of the 1 to 2 ft. and 2 to 3 ft. grade. Experience has shown that one year old trees and 1 to 2 ft. and 2 to 3 ft. grade trees will outgrow the old large trees and at the end of second year after planting with proper cultivation side by side will be the largest tree and the old large tree will be the smallest tree. The small trees will come into bearing fruit in paying quantities just as soon as the old large trees. The large trees have too much wood for the root system and has not sufficient sap flow to stand the drying heat of summer and is injured in a way that it rarely ever recovers. Many nursery tree agents prefer to push the large trees because they ask so much more for them. We recommend the one year trees and the 1 to 2 ft. and 2 to 3 ft. grade, and if higher priced trees are wanted 3 to 4 ft. grade. The difference in the grade of one-year trees is largely caused because the larger ones are budded a little earlier or the land on which they grew was slightly more fertile.

We advocate the planting of one-year trees upon the following grounds, and especially the one to two and the two to three feet, and if you want a higher priced tree the three to four feet grades. When transplanted in the orchard the one year tree takes hold of the soil, and the shock does not stunt its growth as it does the two-year old. They come into bearing sooner, live longer, and it can be trained and pruned to suit the taste of each individual. The one-year is a great deal cheaper, and lessens the planter's original investment and also lessens transportation charges. We recommend one-year planting. Here is what prominent horticulturists and experiment stations say:

"It is the belief of this station that the one-year apple tree is better, most economical and the safest tree to plant."—J. C. Whitten, Experiment Station, University of Missouri.

Below we quote from the Maryland Experiment Station Bulletin, No. 144, written by Mr. C. P. Close, state horticulturist, which appears under the heading, "Age and Kind of Nursery Tree for Planting." "The writer prefers, above all others, a well-grown one-year-old tree. A one-year-old tree may be headed low, as the first crop of branches may be used for the foundation branches, selecting those best placed. Furthermore, a one-year-old tree is cheaper than a two-year-old."

"My advice is always in favor of one-year-old trees. Fully 90 percent of a grove of trees that are now planted for commercial use are of this age."—G. B. Brackett, U. S. Entomologist.

"I have advocated the planting of one-year-old trees for years. You get a better root system in the one year trees, and one-year trees pack better, arrive in better condition, and at less freight and express cost to the planter."—J. H. Hale, the "Peach King."

CATALOG WILL BE MAILED FREE UPON REQUEST

If you haven't had a copy or have lost a copy that has been sent you our 68 page catalog for fall 1920 and spring 1921, write for copy, it will gladly be mailed you free. If you receive more than one copy of this price list, or if you do not expect to place an order this spring if you will hand this price list to some of your friends who think will send us an order, we will appreciate it. They will too.

WHAT OTHERS THINK OF OUR STOCK

We have thousands of letters from satisfied customers in every state in the United States and in many foreign countries that read like the few below:

"Neosho, Mo., Oct. 8th, 1920. Please send me your catalog, those little trees Mr. Parker, my neighbor bought of you last spring are beautiful—I want some like them.

Mrs. Corrida Caldwell, R. F. D. No. 2.

"Salem, Va., R. F. D. No. 2, Oct. 22nd, 1920. Last year we ordered 750 peach trees and 500 apple trees from you. They have proved entirely satisfactory. H. E. Beatty, R. F. D. No. 2.

"Quincy, Ill., R. F. D. No. 7, Box 40, September 14th, 1920. I have just finished picking peaches from the two hundred peach trees bought of you five years ago. I picked about three hundred bushels from the two hundred trees. I want more of your fine peach trees.

Wm. Kasparie.

A. S. Keagy, R. F. D. No. 3, Litchfield, Ill., writes Sept. 20th, 1920. We bought a lot of peach trees from you two years ago, we are this year eating peaches from them."

SHIPMENT OF OUR TREES TO FAR AWAY CHINA REACHED THERE IN PERFECT CONDITION

Cheu Chee Chong.

East Street, Mazin, Chekiang, China, Jan. 25th, 1920

Tennessee Nursery Company,
Cleveland, Tenn.

Gentlemen:—Your letter and the shipment of trees you sent to Shanghai College were received with thanks. I am glad to know that you trusted me on the balance due on the shipment, as you could not send them to this country for the balance due C. O. D. I am at Mazin at this time and cannot buy money order until I return to Shanghai College. The entire shipment of peach trees, pear trees, plum trees were in perfect condition when they reached Shanghai College, China, and I am well pleased.

Sincerely yours,

Prof. M. L. Chew

1 to 4 trees or plants are sold at "each" rate; 5 to 49 are sold at the "10" rate; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at 1000 rate.

Special Wholesale Price List

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

TENNESSEE NURSERY COMPANY

CLEVELAND, TENNESSEE

FEBRUARY 18, 1921

These prices do not apply on orders placed before above date, on order placed before above date, the price in effect on the date order was placed will apply.

STURDY MOUNTAIN GROWN STOCK

Now is the time to plant fruit trees. In a few years fruit cannot be purchased at any price. The war cut short the growing of trees by the nurserymen. The man who has fruit trees will in a few years have a little fortune. Trees are now scarce and hard to get. We would advise you to place your order now.

1 to 4 trees or plants are sold at "each" rate; 5 to 49 are sold at the "10" rate; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at 1000 rate.

You may select any number of varieties that you wish. Different kinds of stock, such as plum, cherry, pear, nut trees, small fruits, etc., cannot be taken together to make up 10, 100, 500, or 1000 rates. As an example: If you should order 50 Mayflower Peach, 10 Elberta Peach, 10 Rome Beauty Apple, and 4 York Imperial, 4 Early Richmond Cherry trees and 6 Keiffer Pear you would be entitled to 100 rates on peach and 10 rate on apple trees, each rate on cherry and 10 rates on the pear trees.

Liberty Bonds or Victory Bonds and War Savings Stamps will be accepted at full face value. War Savings Stamps must be of 1918 or 1920 series.

All prices are f. o. b. Cleveland, Tenn. Large buyers should send list, giving number, size and varieties wanted, for special quotations. The 5 per cent. discount for order within fifteen days on page seven of this price list does not apply on War Saving Stamps and Liberty Bonds.

WE DO NOT ACCEPT ANY ORDER FOR LESS THAN \$1.00 AS WE CAN'T AFFORD TO FILL AN ORDER THAT IS LESS THAN \$1.00

WHY WE ASK OUR CUSTOMERS TO ORDER EARLY

The propagation of Nursery Trees and Plants is an art. It takes three or four years to develop Nursery Stock to planting size. The recent war greatly decreased propagation as 90 pct. of the Fruit Seedlings which Nurserymen plant are imported from France and for the last few years France has been able to furnish only very few seedlings as they cannot get help to grow them. It will be several years before they will again be able to produce the amount of stock they did before the war.

Fruit trees and plants will be high in price for the next four or five years. Hundreds of the smaller firms have already been forced out of business and there are hundreds of others who dig their last trees this spring as they cannot obtain Seedlings for a new planting.

Planters should appreciate the present situation and place their order early as the supply of many Standard varieties will certainly be exhausted before long.

PRICES BATT'S FOUR-EAR PROLIFIC CORN

Gallon, \$2.00 Peck, \$3.00 1/2 Bushel, \$5.00 Bushel, \$8.00. Sacked f. o. b. Cleveland, Tenn. By Express or Parcels Post, not prepaid.

Has yielded as much as 20 1/2 bushels per acre. Has taken premium at several state fairs. You can order now and it will be sent you in time to plant. Positively no order accepted for less than one Gallon.

OLD FASHIONED WHITE ENGLISH PEACH. Nearly as large as Genuine J. H. Hale, skin creamy white, very seldom with any red; pure white to the stone; fine for preserving. One of the finest eating peaches. Clingstone. We have the Genuine Old Fashioned White English. Who does not remember with delight the delicious flavor of this grand old peach. Ripens in September.

PEACHES—Budded.

HENRIETTA PEACH—Larger than Elberta. Most magnificent yellow-meated clingstone known, mostly covered with bright crimson; hardy productive bearer; always commands fancy prices, as it is the latest known variety of peach worthy of merit. In this climate it ripens September the first. This peach is strictly a commercial peach and on account of its late ripening it commands a very high price on the market. It is especially adapted to the South.

SPECIAL SELECT VARIETIES

KEIFFER PEAR—Large, rich, golden yellow; sometimes tinted with red on the sun exposed side, fair quality; excellent for canning. It has become a profitable market variety on account of its good shipping and keeping qualities. To properly ripen should remain on the trees until the leaves began to fall. Tree a most vigorous grower, and early bearer, one of the most resistant to blight, very prolific, and widely planted throughout the country. The tree is so hardy and free from the insect pests, gives it greater value than most other varieties. The fruit is of high color and great beauty, and sells more readily than fruits of better quality. October to November.

Shallotte, N. C., July 1st, 1920.

Gentlemen:—Please send me a copy of your catalog. We have a number of peach trees bought of you two years ago, and they are doing fine. We are canning peaches from them now. They were 1 and 2 ft. and 2 and 3 ft. high when we bought them, but now 12 to 16 feet. Everybody brags on this orchard. Very truly,

1 to 4 trees or plants are sold at "each" rate; 5 to 49 are sold at the "10" rate; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at 1000 rate

SILVER-LEAFED MAPLES—A very quick grower. Trimmed moderately, it becomes of very fine shape. Certainly a very beautiful ornamental tree if given room to develop. Valuable where quick shade is desired, and grows to a good size. Very valuable on account of growing so rapid. Plant Silver-Leafed Maples and you will have shade in a short time. They are not like other shade trees, it is not necessary to wait a life time to have shade.

MERCHANTS BANK

Cleveland, Tenn.

CLEVELAND, TENN., March 8, 1921

Dear Sir:

If you haven't placed your order for all the fruit trees, vines, plants, etc., that you are going to need this spring, we would suggest that you do so at once. You have plenty of time to buy and plant this spring. By planting this spring you will bring your orchard into bearing a year sooner than you would if you waited until fall. Don't delay your planting until next fall but plant this spring and get ripe fruit from your orchard a whole year sooner than you would if you had waited next fall to plant. Cash return will come in quicker by planting this spring.

Remember that we accept War Savings, Liberty Bonds at full face value in exchange for nursery stock. A great many have taken advantage of this offer and if you are short of money and

Dear Sir:

If you haven't placed your order for all the fruit trees, vines, plants, etc., that you are going to need this spring, we would suggest that you do so at once. You have plenty of time to buy and plant this spring. By planting this spring you will bring your orchard into bearing a year sooner than you would if you waited until fall. Don't delay your planting until next fall but plant this spring and get ripe fruit from your orchard a whole year sooner than you would if you had waited next fall to plant. Cash return will come in quicker by planting this spring.

Remember that we accept War Savings, Liberty Bonds at full face value in exchange for nursery stock. A great many have taken advantage of this offer and if you are short of money and have War Savings stamps or Liberty Bonds it is a mighty fine way to get an orchard started. Sit down right now while the matter of planting your orchard is on your mind and send us your order, it will have our very best attention and will be filled with our high grade, first-class, QUALITY stock that will please you. If you are in a hurry for an order just pin this letter to your order and our 'HURRY UP' department will rush your order right out to you the day it is received. Let yours come forward. It will have our prompt attention. If you have mis-placed or did not receive the catalog we sent you write us for another copy which we will gladly send.

We will extend the 5% discount named on page eight of our price list to you fifteen days from the date of this letter.

Very truly,
Tennessee Nursery Company.

P. S. If you want as many as 500 or more trees write us for special prices. When asking for special prices in 500 or more lots be sure to give the NUMBER of EACH VARIETY and state the SIZE of trees wanted. In other words be sure to send exact list of what you want in lots of 500 or more.

Dear Customer:

We will allow you a special discount of 5 per cent. from this price list, if you will send in your order within 15 days from above date, returning this slip and send Cash in full with order. If you wish you may deduct 5 per cent. from your order or we will send the 5 per cent. in such stock as you may select. This 5 per cent. discount does not apply on War Savings Stamps and Liberty Bonds. Remember too, we can hold your order and ship out at any time later in the season that you may instruct us. Better buy now while they last.

BUY NOW AND GET THE 5 PER CENT. DISCOUNT.
Many times this discount will pay Parcel Post or Express

1 to 4 trees or plants are sold at "each" rate; 5 to 49 are sold at the "10" rate; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at 1000 rate.

WHAT AGE, SIZE AND PRICE TREES DO YOU WANT TO PLANT?

Commercial orchardists nearly always select one year old trees of the 1 to 2 ft. and 2 to 3 ft. grade. Experience has shown that one year old trees and 1 to 2 ft. and 2 to 3 ft. grade trees will outgrow the old large trees and at the end of second year after planting with proper cultivation side by side will be the largest tree and the old large tree will be the smallest tree. The small trees will come into bearing fruit in paying quantities just as soon as the old large trees. The large trees have too much wood for the root system and has not sufficient sap flow to stand the drying heat of summer and is injured in a way that it rarely ever recovers. Many nursery tree agents prefer to push the large trees because they ask so much more for them. We recommend the one year trees and the 1 to 2 ft. and 2 to 3 ft. grade, and if higher priced trees are wanted 3 to 4 ft. grade. The difference in the grade of one-year trees is largely caused because the larger ones are budded a little earlier or the land on which they grew was slightly more fertile.

We advocate the planting of one-year trees upon the following grounds, and especially the one to two and the two to three feet, and if you want a higher priced tree the three to four feet grades. When transplanted in the orchard the one year tree takes hold of the soil, and the shock does not stunt its growth as it does the two-year old. They come into bearing sooner, live longer, and it can be trained and pruned to suit the taste of each individual. The one-year is a great deal cheaper, and lessens the planter's original investment and also lessens transportation charges. We recommend one-year planting. Here is what prominent horticulturists and experiment stations say:

"It is the belief of this station that the one-year apple tree is better, most economical and the safest tree to plant."—J. C. Whitten, Experiment Station, University of Missouri.

Below we quote from the Maryland Experiment Station Bulletin, No. 144, written by Mr. C. P. Close, state horticulturist, which appears under the heading, "Age and Kind of Nursery Tree for Planting." "The writer prefers, above all others, a well-grown one-year-old tree. A one-year-old tree may be headed low, as the first crop of branches may be used for the foundation branches, selecting those best placed. Furthermore, a one-year-old tree is cheaper than a two-year-old."

"My advice is always in favor of one-year-old trees. Fully 90 percent of all apple trees that are now planted for commercial use are of this age."—G. B. Brackett, U. S. Pomologist.

"I have advocated the planting of one-year-old trees for years. You get a better root system in the one year trees, and one-year trees pack better, arrive in better order, and at less freight and express cost to the planter."—J. H. Hale, the "Peach King."

CATALOG WILL BE MAILED FREE UPON REQUEST

If you haven't had a copy or have lost a copy that has been sent you of our 68 page catalog for fall 1920 and spring 1921, write for copy, it will gladly be mailed you free. If you receive more than one copy of this price list, or if you do not expect to place an order this spring if you will hand this price list to some of your neighbors or friends who think will send us an order, we will appreciate it. They will too.

WHAT OTHERS THINK OF OUR STOCK

We have thousands of letters from satisfied customers in every state in the United States and in many foreign countries that read like the few below:

"Neosho, Mo., Oct. 8th, 1920. Please send me your catalog, those little trees Mr. Parker, my neighbor bought of you last spring are beautiful—I want some like them. Mrs. Corridia Caldwell, R. F. D. No. 2.

"Salem, Va., R. F. D. No. 2, Oct. 22nd, 1920. Last year we ordered 750 peach trees and 500 apple trees from you. They have proved entirely satisfactory. H. E. Beatty, R. F. D. No. 2.

"Quincy, Ill., R. F. D. No. 7, Box 40, September 14th, 1920. I have just finished picking peaches from the two hundred peach trees bought of you five years ago. I picked about three hundred bushels from the two hundred trees. I want more of your fine peach trees. Wm. Kasparie.

"A. S. Keagy, R. F. D. No. 3, Litchfield, Ill., writes Sept. 20th, 1920. We bought a lot of peach trees from you two years ago, we are this year eating peaches from them."

SHIPMENT OF OUR TREES TO FAR AWAY CHINA REACHED THERE IN PERFECT CONDITION

Cheu Chee Chong.

East Street, Mazin, Chekiang, China, Jan. 25th, 1920

Tennessee Nursery Company,
Cleveland, Tenn.

Gentlemen:—Your letter and the shipment of trees you sent to Shanghai College were received with thanks. I am glad to know that you trusted me on the balance due on the shipment, as you could not send them to this country for the balance due C. O. D. I am at Mazin at this time and cannot buy money order until I return to Shanghai College. The entire shipment of peach trees, pear trees, plum trees were in perfect condition when they reached Shanghai College, China, and I am well pleased.

Sincerely yours,

Prof. M. L. Chew

1 to 4 trees or plants are sold at "each" rate; 5 to 49 are sold at the "10" rate; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at 1000 rate.
